COOLING

HEATING

Termogamma is an Italian-born international group of manufacturing companies, expert in customized high performance energy systems. With our main factories based in Italy, our international business headquarter in Switzerland, and our growing network of local partners, we deliver the Italian traditions and achievements in energy systems and innovations worldwide.

We provide eco-friendly and top efficiency cogeneration and trigeneration systems(from 20kWe to 2MWe) for industries and large public and residential buildings. We take care of our clients every step of the way, from energy consumption analysis and consultancy on the optimum solution, through dimensioning, design and construction of a customized energy system, to its testing, installation, and maintenance.

We would like to have partnership with a local Bulgarian company in the field of maintenance and installation of high efficiency cogeneration systems.
